

NivaDesk Settings

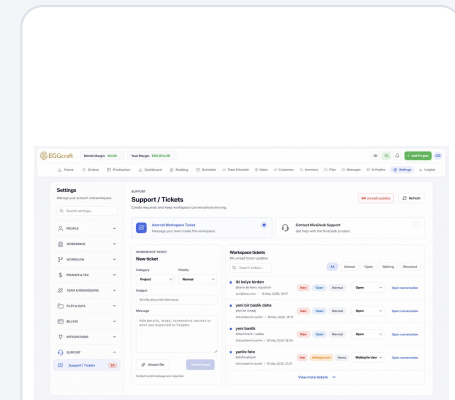

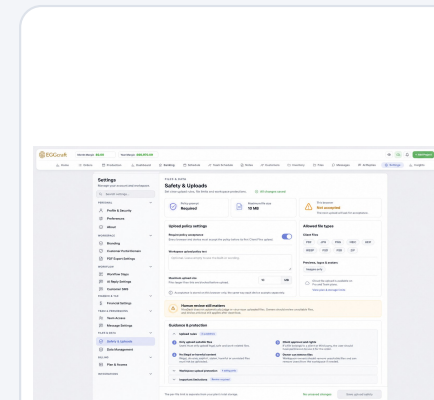

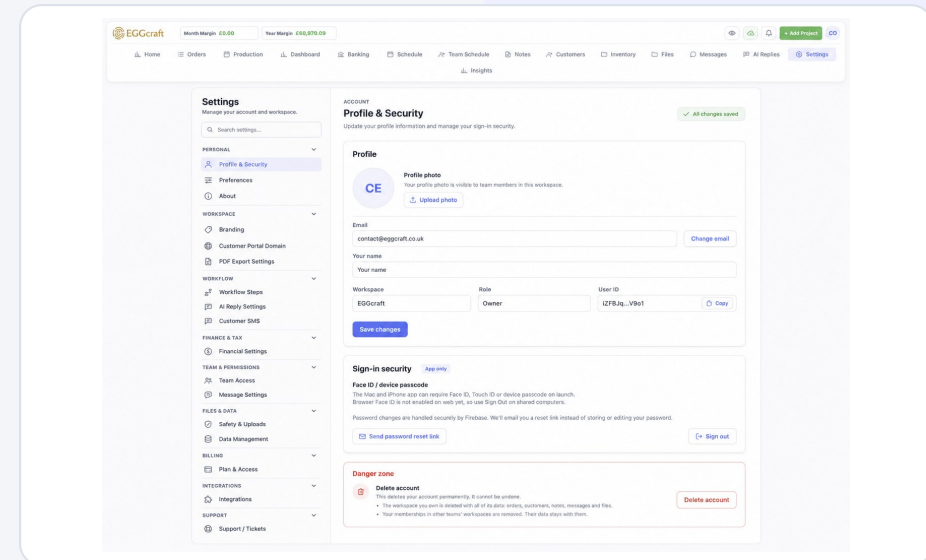

Current vs. Target

AI-ready visual and implementation specification

- 17 live Settings screenshots
- 17 approved target design mockups
- Layout, component and behavior rules
- Section-by-section implementation guidance

SOURCE-OF-TRUTH ORDER

1. Live screenshots define existing functionality and factual content. 2. Target mockups define layout and visual hierarchy. 3. Written rules resolve any conflict.

How the implementing AI must use this file

This is a visual specification, functional inventory and acceptance checklist in one document.

1 Read the system first

- Implement the global shell and tokens before individual pages.
- Treat dimensions and component behavior as shared rules, not one-off styling.

2 Compare every pair

- CURRENT pages show the live product today.
- TARGET pages show the approved direction for the matching section.

3 Preserve functionality

- Keep all real fields, values, validation, permissions and actions.
- A visual element not supported by live functionality is presentation guidance only.

4 Validate visually

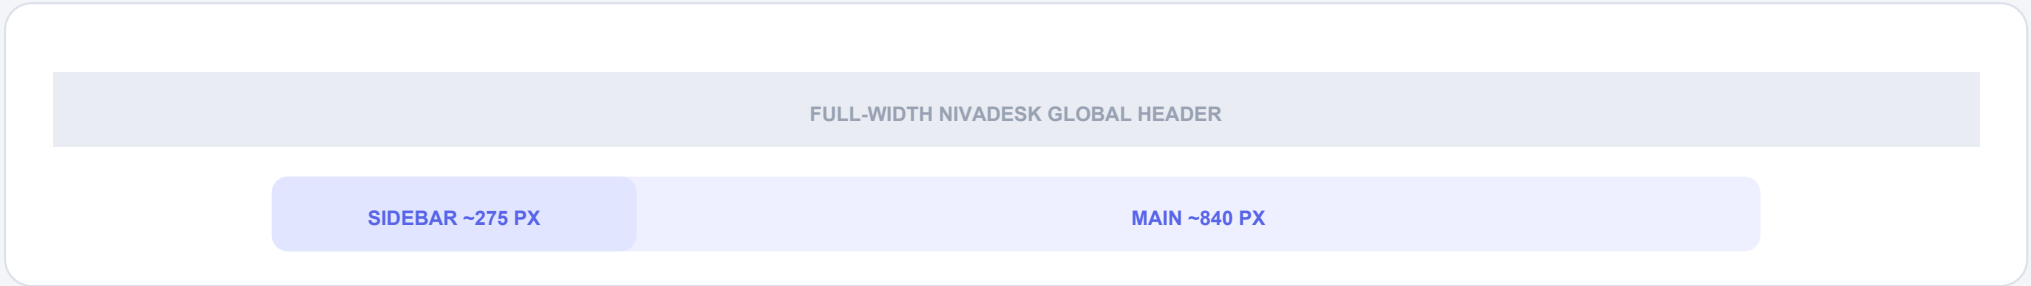

- Check at 1536 px desktop and common narrower widths.
- Capture implementation screenshots and compare spacing, hierarchy and states.

NON-NEGOTIABLES

- Settings content stays centered at 1120-1180 px on a 1536 px canvas; never stretch edge-to-edge.
- Sidebar is about 275 px; main content about 840 px. Global app header stays full width.
- No gradients, glassmorphism, heavy shadows, giant cards or decorative illustrations.
- Green is reserved for success/healthy, amber for caution, muted red for destructive/unread urgency.
- Use exact live functionality. Never invent pricing, integrations, scanning, automation or permissions.
- Loading, empty, error, saved, unsaved, disabled and destructive states must all be intentionally designed.

Global layout and navigation contract

The shell is shared by every page in this document.

Centered Settings workspace: 1120-1180 px at a 1536 px desktop viewport

PERSONAL	WORKSPACE	WORKFLOW	FINANCE & TAX	TEAM & PERMISSIONS	FILES & DATA	BILLING / OTHER
Profile & Security Preferences About	Branding Customer Portal Domain PDF Export Settings	Workflow Steps AI Reply Settings Customer SMS	Financial Settings	Team Access Message Settings	Safety & Uploads Data Management	Plan & Access Integrations Support / Tickets

Sidebar behavior

Header + helper + search stay at the top. Groups are collapsible, use chevrons and 44 px rows. Active row uses a pale periwinkle fill and one accent edge/icon. The sidebar scrolls independently when required; the main page width must not expand when a group is collapsed.

Visual system and reusable components

Use these values as implementation targets; small optical adjustments are allowed.

Core tokens

Canvas
#F3F5F9

Text
#141827

Accent
#5865E8

Caution
#D97706

Surface

Sizing and rhythm

Outer Settings radius	16 px
Card radius	10-12 px
Border	1 px subtle gray
Sidebar row	44 px
Control height	40-44 px
Section gap	20-24 px
Card padding	20-24 px
Body line height	1.4-1.5
Page title	26-30 px / 700
Body	14-15 px / 400

Component rules

Page header	Eyebrow + title + one-sentence purpose. Saved/status indicator aligns right.	Cards	Group by user goal, not database entity. Avoid a separate card for every small fact.
Forms	Persistent labels, helper text next to its field, visible validation, 40-44 px controls.	Toggles	Use for immediate binary settings. Label and consequence remain readable when OFF.
Buttons	One primary action per region. Secondary actions outlined/neutral; destructive muted red.	Status	Always combine color with words/icons: Connected, Waiting, Active, Not accepted.
Tables/lists	Dense operational data uses rows and dividers; avoid oversized repeated cards.	Save bar	Shows dirty state, save action and discard/reload behavior. Disabled when unchanged.
Responsive	At narrower widths stack secondary columns; sidebar becomes a drawer, not a squeeze.	Accessibility	Keyboard focus, 4.5:1 body contrast, 44 px hit areas, semantic labels and live status.

CUSTOMER SMS
Text updates to your customers

A short text at the moments a customer is waiting on: an estimate to approve, a piece ready to collect. One-way, and always about an order they already have with you — never a promotion.

Not set up - SMS is not switched on for this server yet.
Nothing is sent until it is. Contact NivaDesk support and we will enable it.

WHEN A TEXT GOES OUT
Choose the moments

Estimate ready
Sent when an estimate is waiting for the customer to approve it. ☒

Work started
Sent when the piece moves onto the bench. ☒

Ready for collection
Sent when the work is finished and the customer can come in. ☒

Every status change
Sent at every step of your workflow, not only the three above. Most workshops leave this off: internal steps mean little to a customer, and every message is charged. ☐

These choices apply to the whole workspace. A text still only goes to a customer whose order has Automatic Updates and SMS switched on, on the order's Customer Portal card.

SENDER
The name your text arrives from

NivaDesk sender ID
Registered and waiting for network approval. Until it lands, nothing sends from this name.

Your own sender ID
None
Your customers see NivaDesk, and your workspace name is put at the start of the message instead.

Register your own sender ID
Up to 11 letters, numbers and spaces. A customer trusts a text from your studio's name more than one from ours.

EGGcraft

Changing this name starts the registration again: the networks approve a name, not a workspace, so a new one goes back to waiting. NivaDesk cannot mark it verified itself — that answer only comes from them.

PHONE NUMBERS
Default calling code

Calling code
Digits only, no plus sign. Used when a customer's saved number has no country code of its own — 44 is the United Kingdom.

✓ No unsaved changes
44

How do I...?

Mevcut değerlendirme

Ne sorun yaratıyor?

- SMS sağlayıcı/durum bilgisi ve bildirim olayları uzun sayfaya yayılıyor.
- Hangi müşteri olayında mesaj gideceği hızlıca taranamıyor.
- Gönderen bilgisi, maliyet/limit ve mesaj önizlemesi birbirinden kopuk.

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

Customer SMS All changes saved

Send timely one-way order updates without turning them into promotions.

SMS is not enabled yet
Nothing will be sent until NivaDesk enables SMS for this server. [NOT SET UP](#) [Contact support](#)

Notification moments
Choose which order events can send a customer text.

Event	Description	Toggle
Estimate ready	Sent when an estimate is waiting for approval.	☒
Work started	Sent when the piece moves onto the bench.	☒
Ready for collection	Sent when the work is finished and ready to collect.	☒
Every status change	Sends at every workflow step. Most workshops leave this off; internal steps may not help customers and every message is charged.	☐

A message is sent only when Automatic Updates and SMS are also enabled on that order.

Sender identity
Choose the name customers see when a message arrives.

NivaDesk sender ID
Awaiting network approval
Nothing sends from this name until the network approves it.

Your sender ID
None
Customers currently see NivaDesk, with your workspace name at the start of the message.

Register your own sender ID
EGGcraft Up to 11 letters, numbers and spaces [Register sender ID](#)

Changing the name starts network approval again.

Phone numbers
Default calling code
+ 44
Used only when a saved customer number has no country code. Existing country codes are preserved.

Usage this month
SEPTEMBER 2026
Messages: 0 Segments: 0 Spend: US\$0.00
No messages have been sent, so there is nothing to charge. [Reload usage](#)

These choices apply to the whole workspace. [Save SMS settings](#)

Uygulama direktifi

Bu ekranda ne değişiyor?

- Üstte SMS availability/connection durumunu açıklayan saikin bir durum bandı kullan.
- Bildirim olaylarını açıklama ve toggle içeren tutarlı satırlara dönüştür.
- Sender identity ve hedef telefon davranışını ayrı ayar kartında grupta.
- Sağ tarafta telefon biçimli gerçekçi SMS preview ve karakter/kredi özeti göster.
- Kurulum gerektiren eylemi net tek CTA ile; normal kaydetmeden ayrı sun.

MUST PRESERVE

Mevcut SMS durumu, notification event seçenekleri, sender/phone alanları ve canlı limit bilgisi.

Financial Settings Workspace - Owner managed

Control currency, fees and tax calculations for this workspace.

Currency & formatting

Currency Symbol: GBP (£)

Decimal Separator: Dot (.) Comma (,)

Changing the currency symbol only relabels amounts — existing records are never converted between currencies. The decimal separator changes how numbers are shown; CSV exports always use a dot and a separate Currency column.

Defaults for new orders

Avg. Platform Fee (%): 3 %

Default delivery time for new orders (days): 30

Current workspace calculation

Currency: GBP (£)

VAT: 0%

Tax basis: Standard Tax (Services/New)

Applies to: New orders

Follows your edits above. New orders use these values once saved.

Effective dates

Use Tax Transition Date

☐ Use Tax Transition Date

Turning this on reveals a VAT Registration Date field: orders before that date are treated as pre-registration.

Enable Corporation Tax

☒ Enable Corporation Tax

Turning this on reveals a Corporation Tax rate field used in the yearly summary.

Corporation Tax Rate (%): 19 %

Estimated — a planning figure, not your filed liability.

Invoice Footer / Payment Terms

Bank details, payment terms, thank-you note shown on the customer invoice.

Tax calculation

Standard Tax (Services/New)

Prices include VAT. The figure you enter is what the customer pays; the VAT is taken out of it, not added on top.

Margin Scheme (2nd Hand)

Margin scheme: VAT is due on your margin, not on the whole price. The margin already contains the VAT.

What this means

Example: £1,000.00 order = £1,000.00 + £0.00 VAT at 0%

To charge VAT on top of your prices instead, raise the price itself — NivaDesk does not add it at invoice time.

Tax rule label — calculated on revenue

Standard Tax (Services/New)

Tax rule label — calculated on eligible profit

Margin Scheme (2nd Hand)

Default VAT Rate (%)

0 %

Existing order tools

Changing the default calculation model sets the tax rule for new projects. Use recalculation when you want existing projects to adopt the current VAT rule, default VAT rate and platform fee.

✓ No unsaved changes

Recalculate Taxes for Past Orders

How do I...?

Mevcut değerlendirme

Ne sorun yaratıyor?

- Finans, vergi ve varsayılan hesaplama ayarları çok sayıda eşit kartta yarışıyor.
- En sık kullanılan para birimi/vergi bilgisi ile ileri ayarlar ayrışmıyor.
- Uyarılar ve geri dönüşü zor eylemler sayfanın geri kalanına karışıyor.

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

Uygulama direktifi

Bu ekranda ne değişiyor?

- Currency, tax/VAT ve temel hesaplama ayarlarını en üstte özetle.
- Sipariş maliyetleri, ödeme ve kâr görünümü gibi alanları amaçlarına göre iki sütunda grupta.
- Her kontrolün hangi raporları etkilediğini kısa yardımcı metinle açıkla.
- Dikkat gerektiren muhasebe davranışlarında amber bilgi paneli kullan.
- Reset/destructive finans eylemlerini en altta, normal Save alanından ayrı tut.

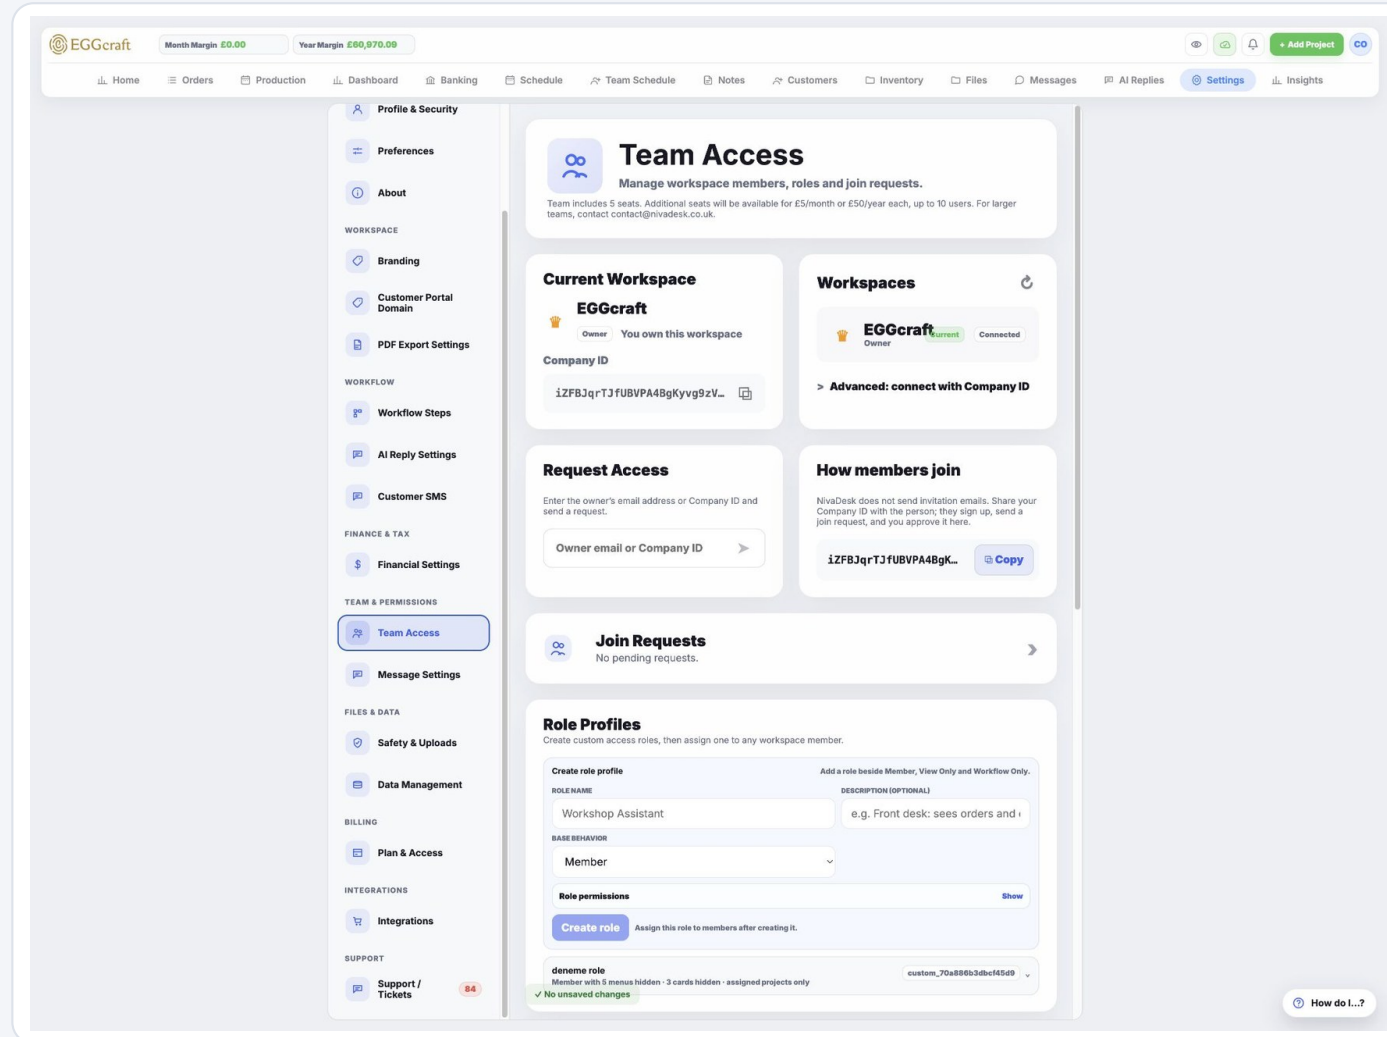

MUST PRESERVE

Canlı sayfadaki currency, tax/VAT, maliyet, kâr ve diğer finansal seçeneklerin tamamı.

CURRENT - LIVE WEB

Team Access

Existing production UI captured from nivadesk.app

Mevcut değerlendirme

Ne sorun yaratıyor?

- Plan kapasitesi, davetler, erişim talepleri ve üyeler uzun kartlarda dağınık.
- Koltuk sınırı ile mevcut takım büyüklüğü ilk bakışta anlaşılıyor.
- Rol ve üyelik eylemleri, normal bilgi alanlarıyla aynı görsel ağırlıkta.

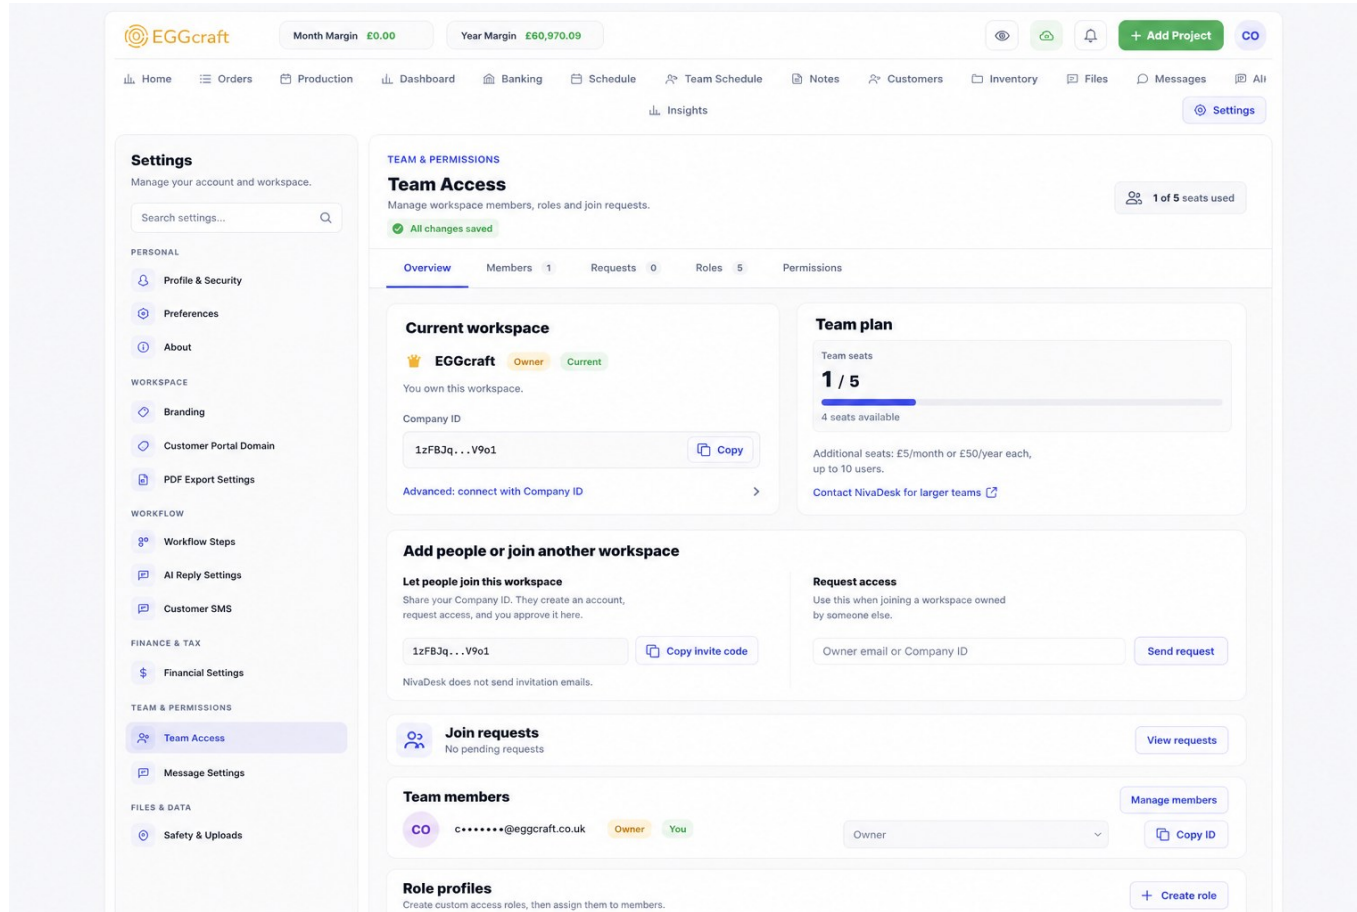

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

TARGET - APPROVED DIRECTION

Team Access

Approved visual concept and implementation intent

Uygulama direktifi

Bu ekranda ne değişiyor?

- Current workspace ve Team plan/seat kullanımını üst özet kartlarında göster.
- Invite people eylemini açık CTA; davet bağlantısını ayrı kopyalama alanı olarak sun.
- Request access ve pending talepleri ayrı, dikkat çekici fakat sakın panelde tut.
- Team members listesini avatar, e-posta, rol ve satır eylemleriyle kompaktlaştır.
- Rol değişiklikleri ve üye kaldırmayı normal gezinme eylemlerinden ayır.

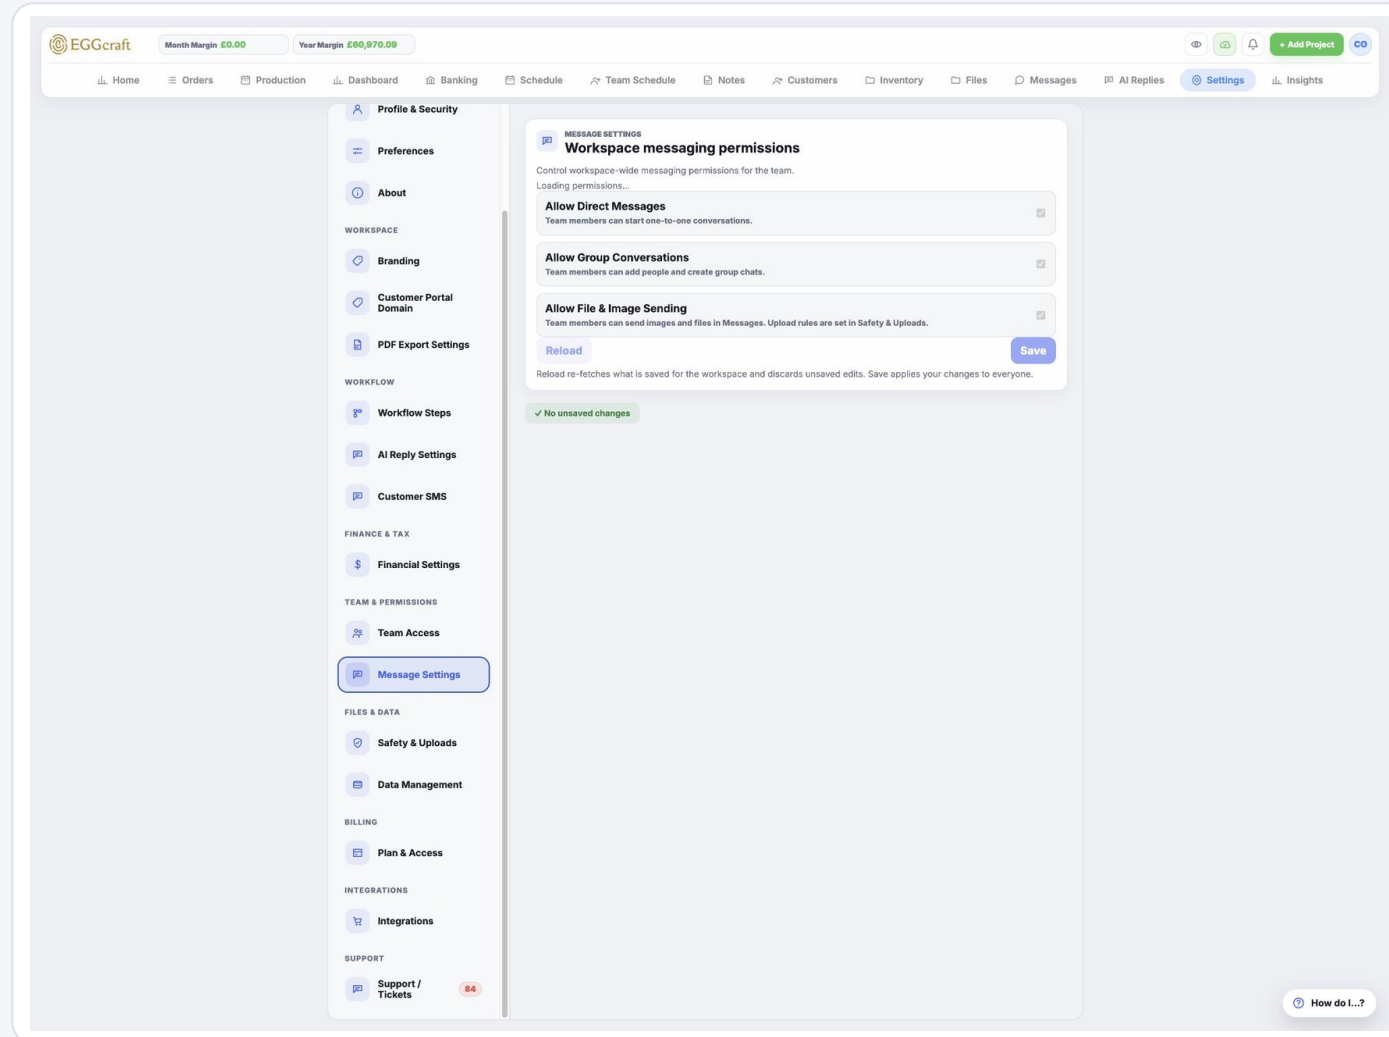

MUST PRESERVE

Workspace/plan bilgileri, seat sınırı, davetler, erişim talepleri, üyeler ve roller.

CURRENT - LIVE WEB

Message Settings

Existing production UI captured from nivadesk.app

Mevcut değerlendirme

Ne sorun yaratıyor?

- Üç basit izin, büyük bir kartta gereğinden fazla boşlukla sunuluyor.
- Workspace-wide kapsam ve tüm ekibe etkisi yeterince görünür değil.
- Dosya paylaşımının Safety & Uploads ile ilişkisi metin içinde kayboluyor.

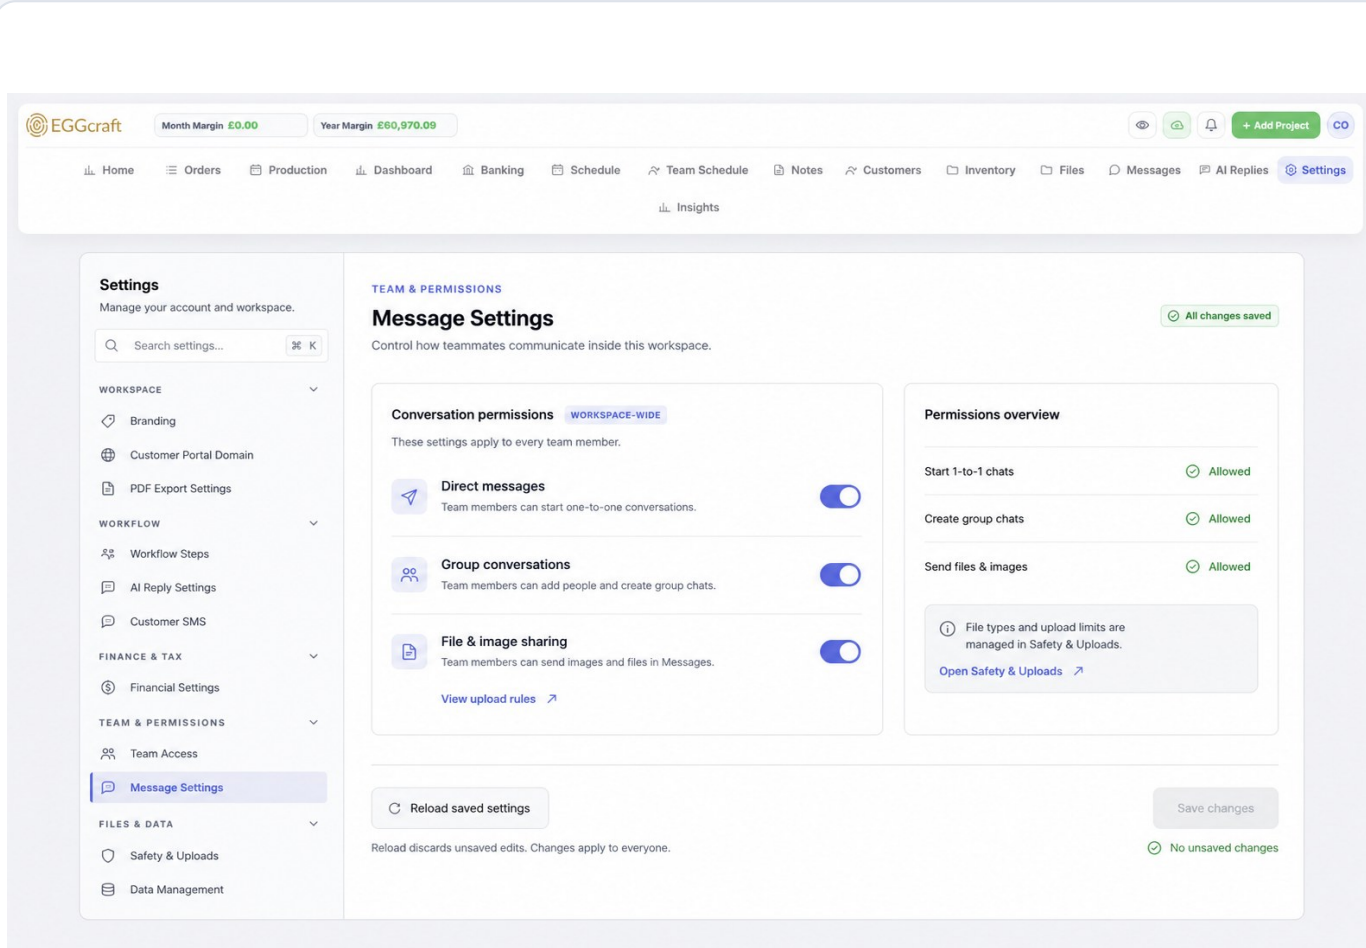

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

TARGET - APPROVED DIRECTION

Message Settings

Approved visual concept and implementation intent

Uygulama direktifi

Bu ekranda ne değişiyor?

- Conversation permissions kartında Direct messages, Group conversations ve File & image sharing toggle'larını göster.
- WORKSPACE-WIDE rozeti ve 'applies to every team member' açıklamasını kart başlığına koy.
- Sağda üç iznin Allowed durumunu özetleyen salt-okunur Permissions overview kullan.
- File & image sharing altında View upload rules / Safety & Uploads bağlantısını görünür yap.
- Reload saved settings ve Save changes eylemlerini alt barda, kaydetme durumuyla birlikte göster.

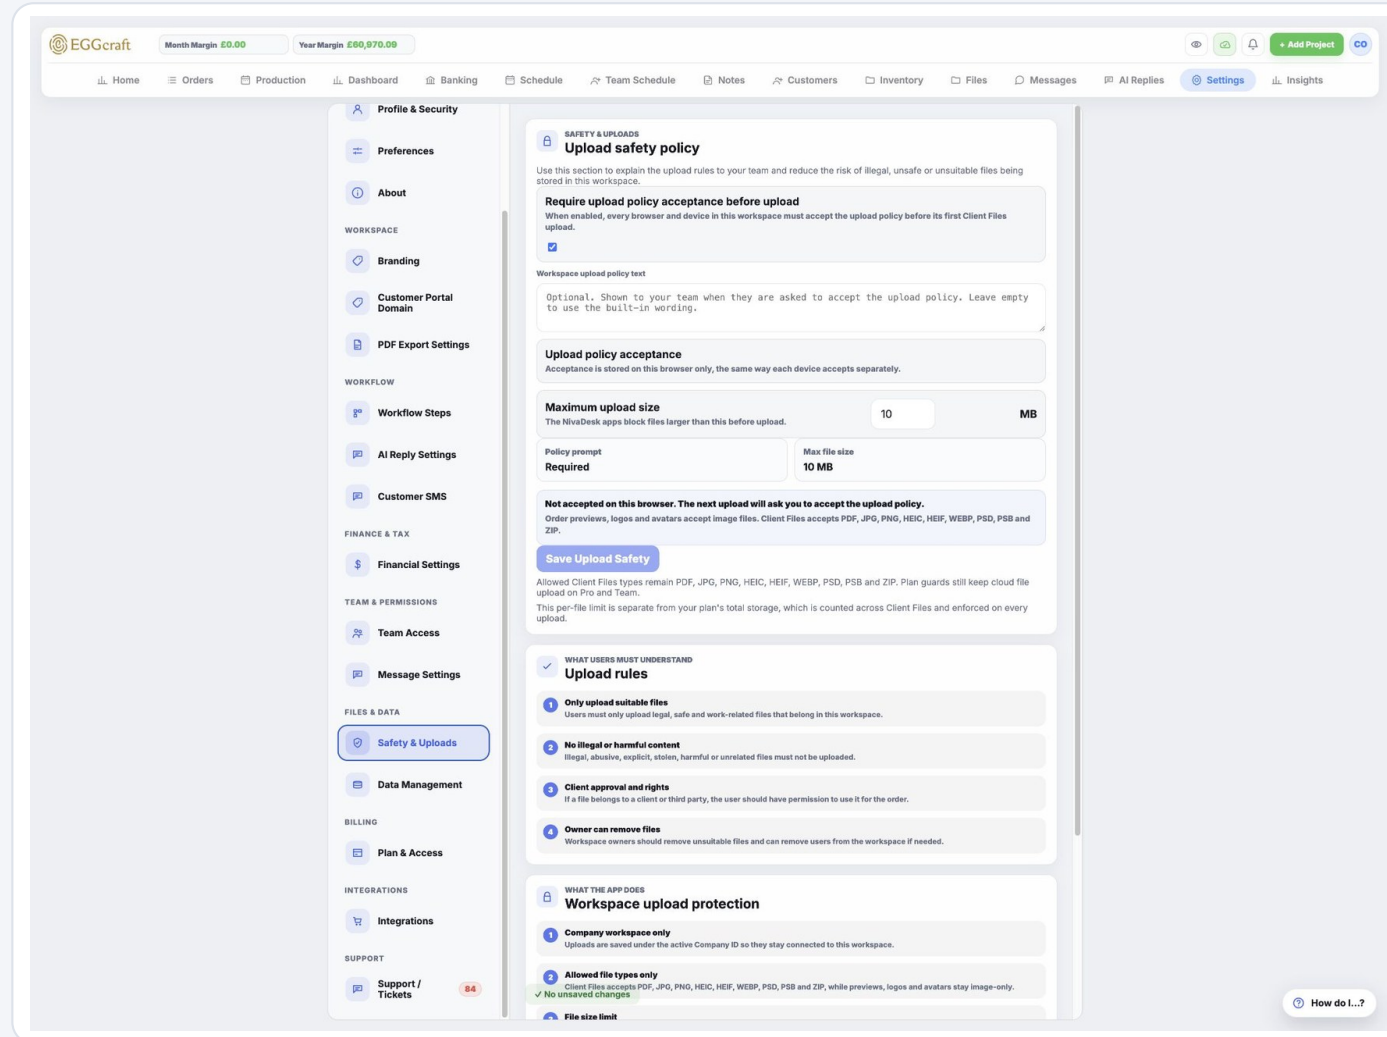

MUST PRESERVE

Üç gerçek izin, Reload, Save ve Safety & Uploads bağlantısı.

CURRENT - LIVE WEB

Safety & Uploads

Existing production UI captured from nivadesk.app

Mevcut değerlendirme

Ne sorun yaratıyor?

- Ayarlar, dosya türleri ve uzun politika açıklamaları aynı ağırlıkta art arda geliyor.
- Required, 10 MB ve browser acceptance durumu sayfada geç fark ediliyor.
- Virüs taraması yapılmadığına dair kritik sınırlama uzun metin içinde kaybolabiliyor.

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

FILES & DATA

Safety & Uploads
Set clear upload rules, file limits and workspace protections. All changes saved

Policy prompt
Required

Maximum file size
10 MB

This browser
Not accepted
The next upload will ask for acceptance.

Upload policy settings

Require policy acceptance
Every browser and device must accept the policy before its first Client Files upload. ☒

Workspace upload policy text
Optional. Leave empty to use the built-in wording.

Maximum upload size
Files larger than this are blocked before upload. 10 MB

Acceptance is stored on this browser only, the same way each device accepts separately.

Allowed file types

Client Files

PDF JPG PNG HEIC HEIF

WEBP PSD PSB ZIP

Previews, logos & avatars
Images only

Cloud file upload is available on Pro and Team plans. [View plan & storage limits](#)

Human review still matters
NvidiaDesk does not automatically judge or virus-scan uploaded files. Owners should review unsuitable files, and device antivirus still applies after download.

Guidance & protection

Upload rules 4 guidelines

- Only upload suitable files**
Users must only upload legal, safe and work-related files.
- No illegal or harmful content**
Illegal, abusive, explicit, stolen, harmful or unrelated files must not be uploaded.
- Client approval and rights**
If a file belongs to a client or third party, the user should have permission to use it for the order.
- Owner can remove files**
Workspace owners should remove unsuitable files and can remove users from the workspace if needed.

Workspace upload protection 4 safeguards

Important limitations Review required

The per-file limit is separate from your plan's total storage.

No unsaved changes [Save upload safety](#)

Uygulama direktifi

Bu ekranda ne değişiyor?

- Üstte Policy prompt: Required, Maximum file size: 10 MB ve This browser: Not accepted özetlerini göster.
- Policy acceptance toggle, policy text ve 10 MB input'unu tek ayar kartında topla.
- İzin verilen Client Files türlerini salt-okunur chip'lerle ayrı kartta göster.
- Human review still matters ve no virus scan bilgisini amber uyarı panelinde görünür tut.
- Upload rules, Workspace protection ve Important limitations içeriklerini accordion yapısında düzenle.

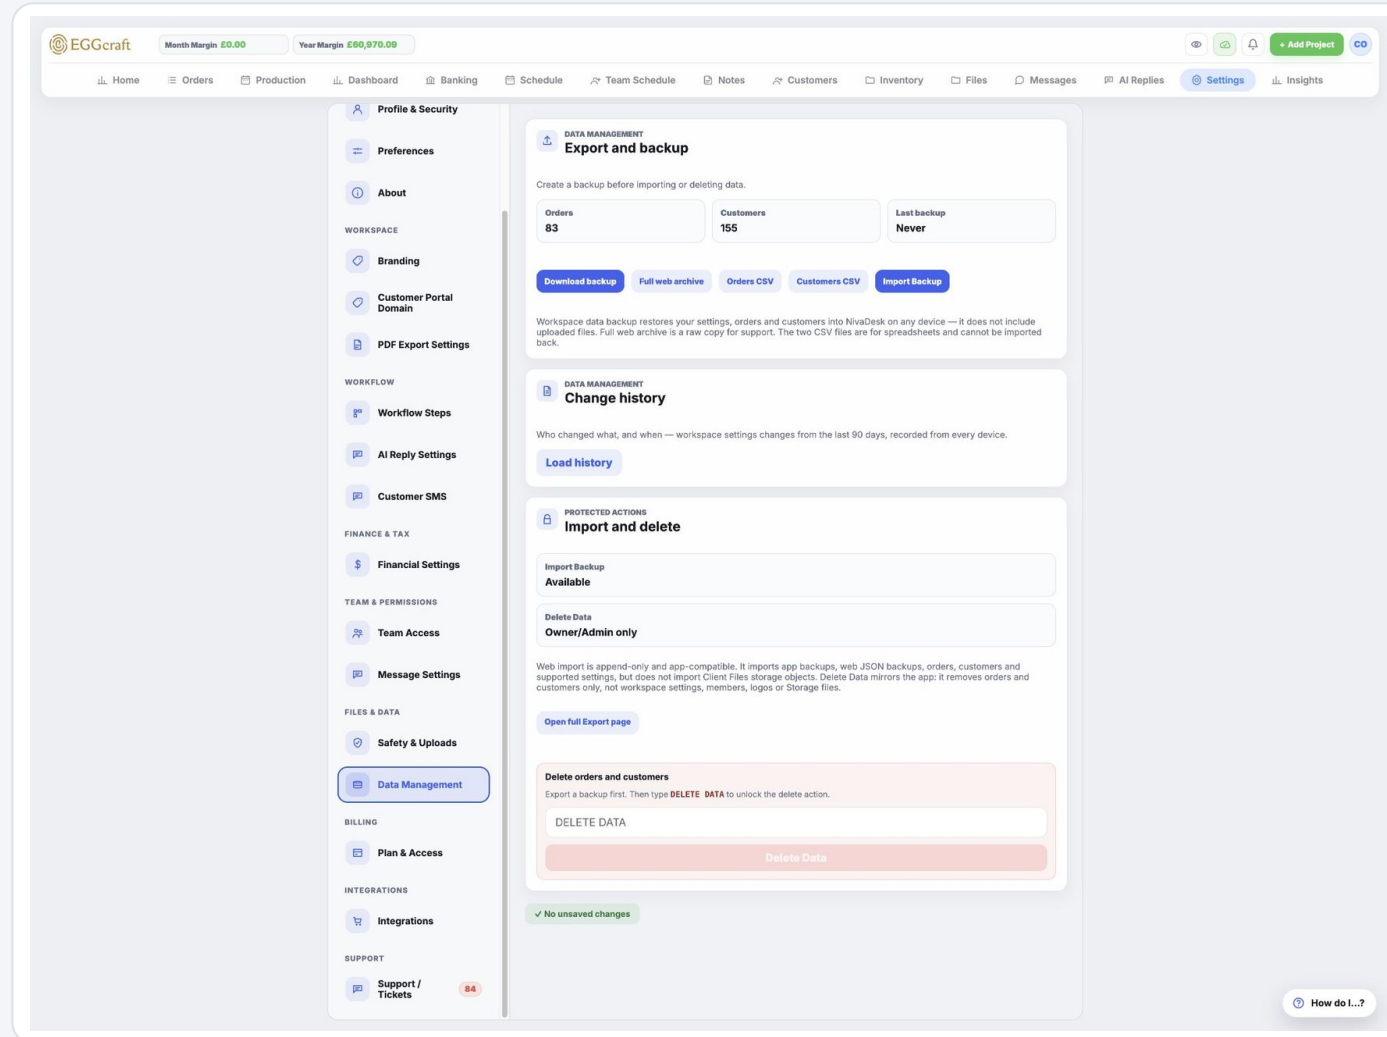

MUST PRESERVE

Acceptance toggle, policy text, 10 MB sınırı, dosya türleri, plan guard ve tüm güvenlik açıklamaları.

Integrations

Existing production UI captured from nivadesk.app

Mevcut değerlendirme

Ne sorun yaratıyor?

- Bağlı servisler kategori kartlarının içine karışıyor ve durum taraması zorlaşıyor.
- Coming soon araçları çok sayıda boş kart oluşturarak ekranı uzatıyor.
- Native available ile Via webhook seçenekleri yeterince belirgin ayrışmıyor.

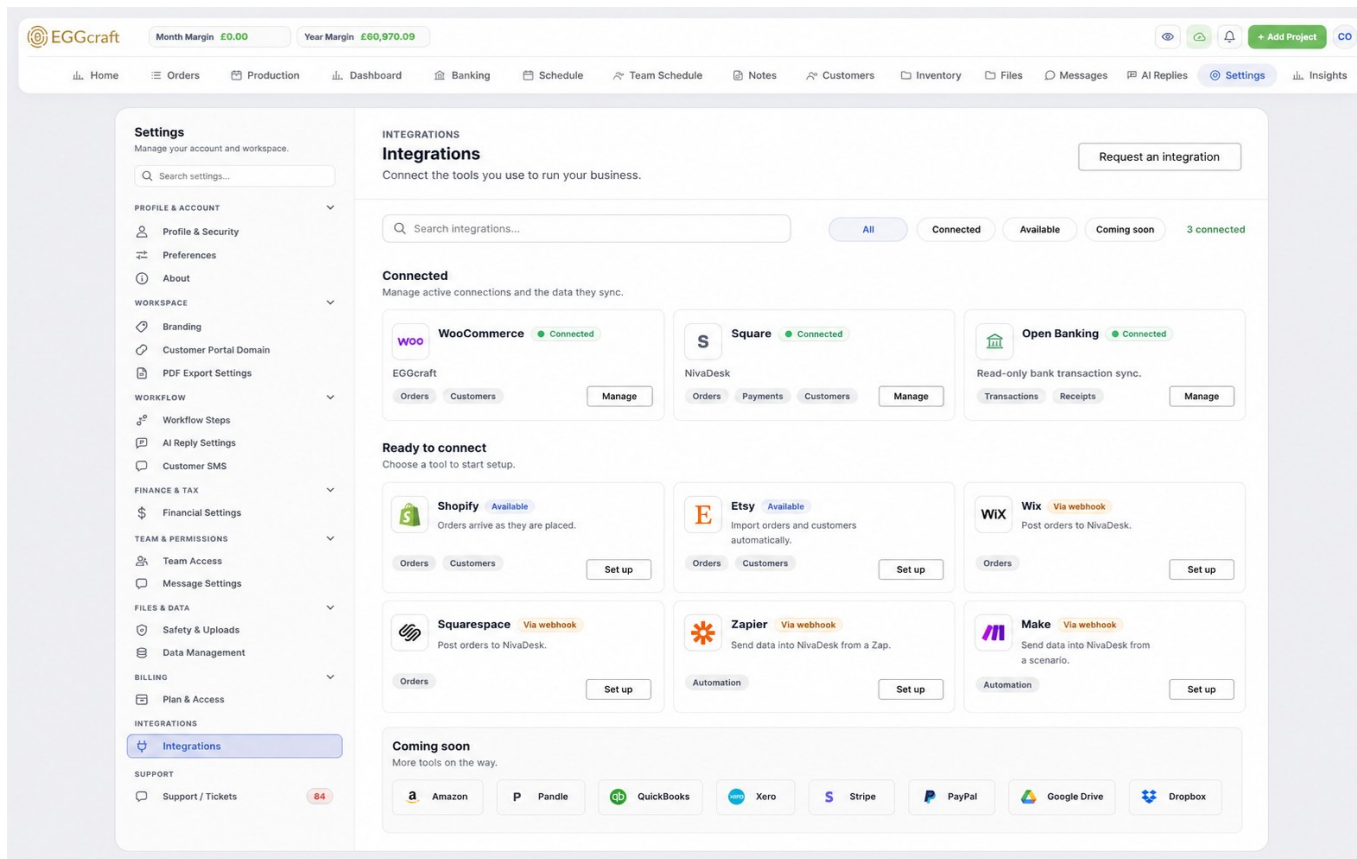

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

TARGET - APPROVED DIRECTION

Integrations

Approved visual concept and implementation intent

Uygulama direktifi

Bu ekranda ne değişiyor?

- Üstte search, All/Connected/Available/Coming soon filtreleri ve 3 connected bilgisini göster.
- WooCommerce, Square ve Open Banking'i ilk satırdaki Connected kartlarında öne çıkar.
- Shopify, Etsy, Wix, Squarespace, Zapier ve Make'i Ready to connect grid'inde göster.
- Webhook bağlantılarını amber Via webhook rozetiyle; native seçenekleri Available ile işaretle.
- Amazon, Pandle, QuickBooks, Xero, Stripe, PayPal, Google Drive ve Dropbox'ı kompakt Coming soon alanında topla.

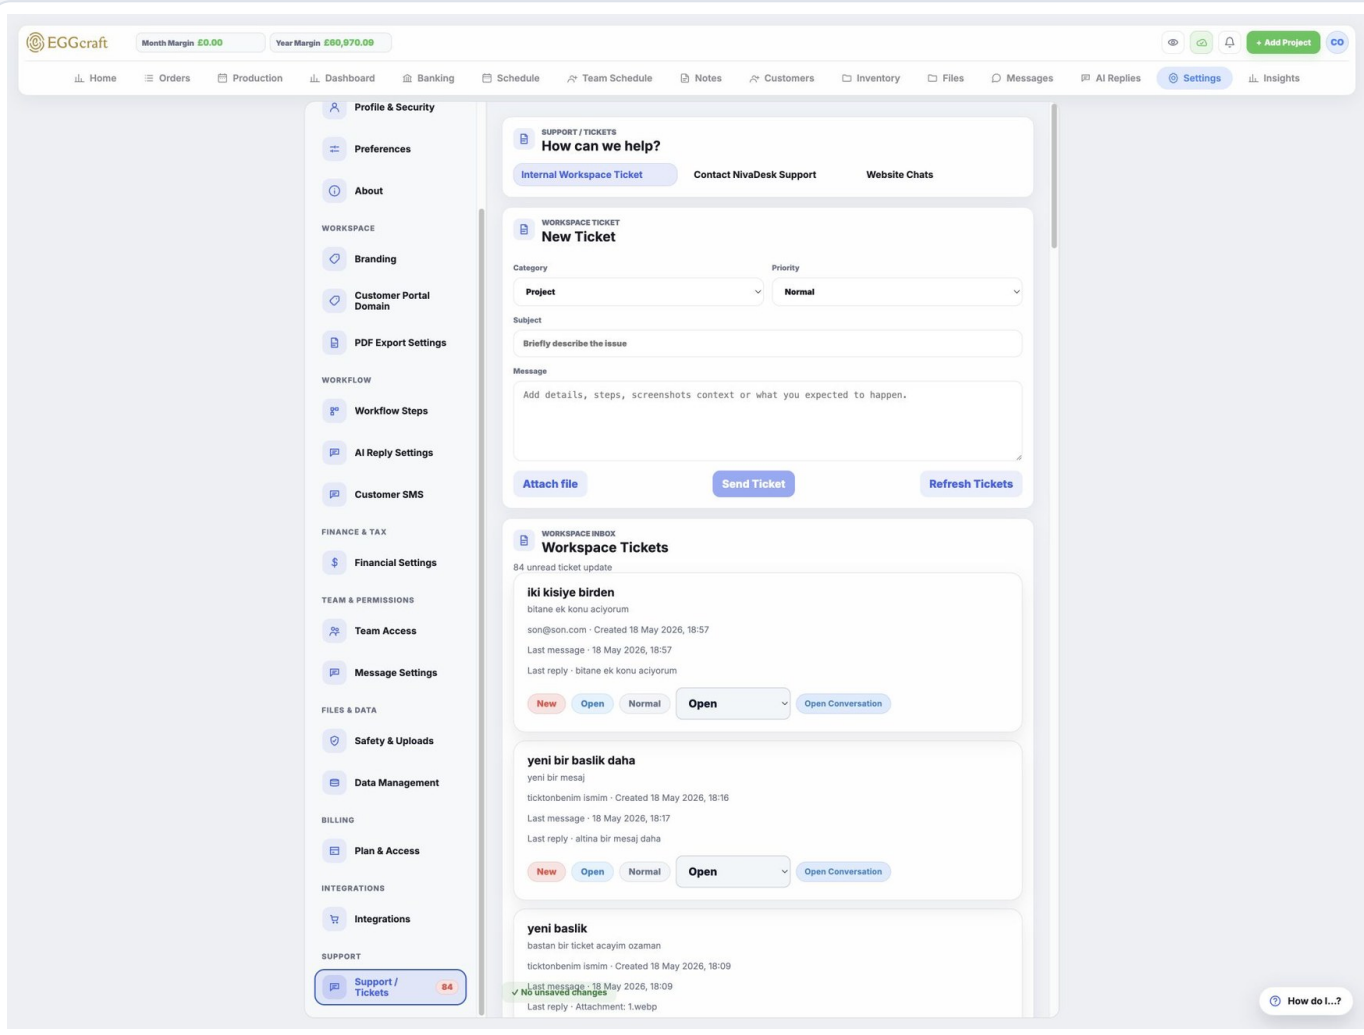

MUST PRESERVE

Tüm gerçek servisler, bağlı hesap etiketleri, sync kapsamı, Set up/Manage ve Request an integration.

CURRENT - LIVE WEB

Support / Tickets

Existing production UI captured from nivadesk.app

Mevcut değerlendirme

Ne sorun yaratıyor?

- Yeni ticket formu tüm genişliği kaplıyor; 84 okunmamış güncelleme aşağıdaki uzun listede kayboluyor.
- Her ticket büyük kart olduğu için konu, durum ve son yanıt taramak yavaş.
- Internal Workspace Ticket ile NivaDesk Support seçimi yeterince açıklanmıyor.

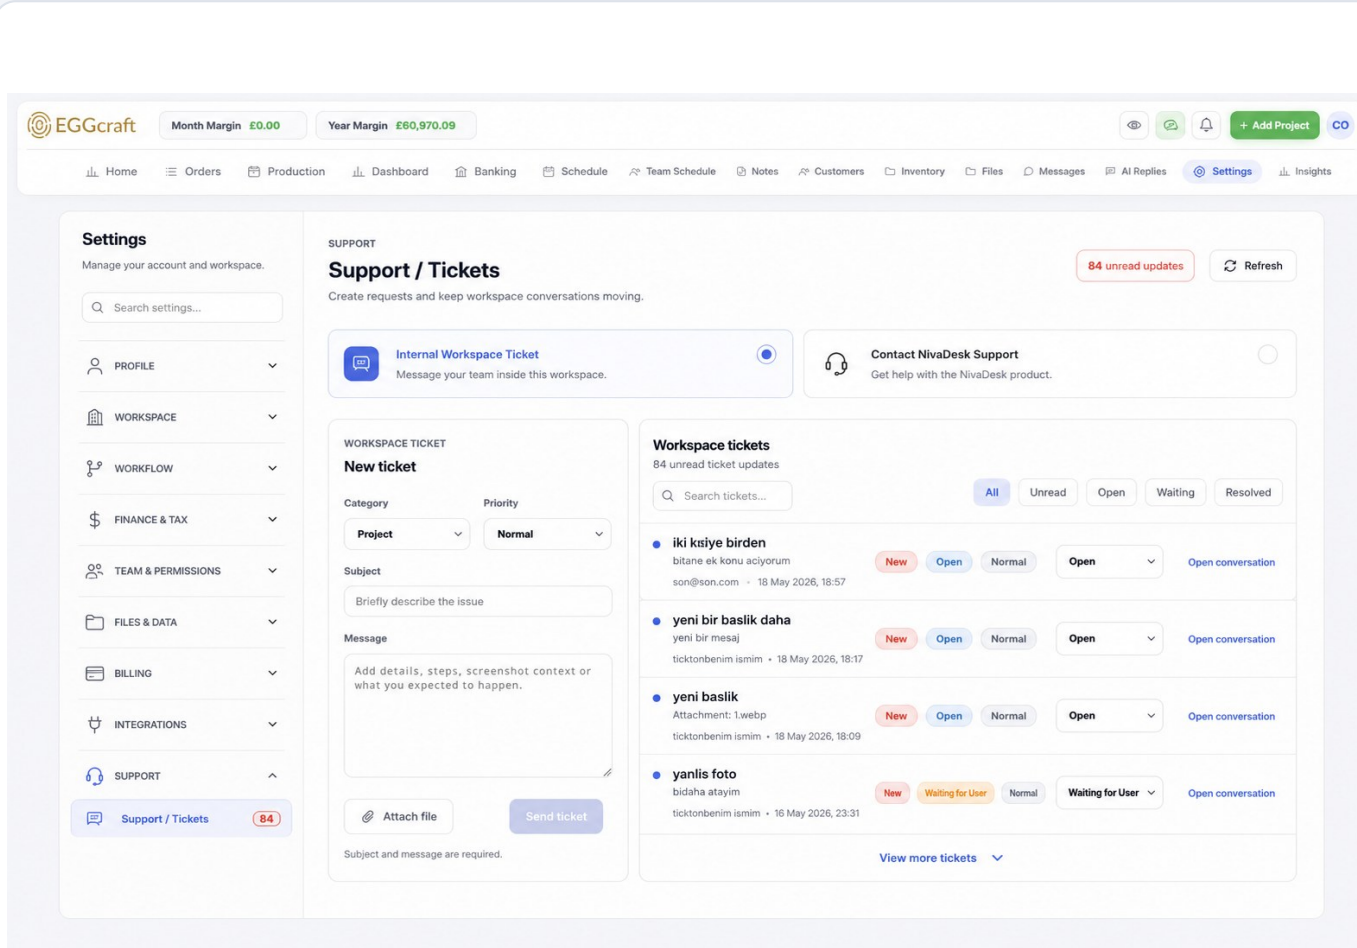

FUNCTIONAL SOURCE OF TRUTH

Alanlar, değerler, erişim kuralları ve gerçek eylemler bu canlı görüntüden ve uygulamadan alınmalıdır.

TARGET - APPROVED DIRECTION

Support / Tickets

Approved visual concept and implementation intent

Uygulama direktifi

Bu ekranda ne değişiyor?

- Üstte iki açıklamalı seçenek kullan: Internal Workspace Ticket ve Contact NivaDesk Support.
- Sol sütunda Category, Priority, Subject, Message ve Attach file içeren kompakt New ticket formu göster.
- Sağ sütunda search ve All/Unread/Open/Waiting/Resolved filtreli Workspace tickets inbox kullan.
- Ticket satırında unread dot, title, snippet, sender/date, New/status/priority ve Open conversation bulunmalı.
- 84 unread updates rozetini başlıkta göster; bunun toplam ticket sayısı olduğunu ima etme.

MUST PRESERVE

İki support modu, gerçek kategori/öncelik seçenekleri, ek dosya, durum dropdown'u ve konuşma açma eylemi.

Definition of done

The Settings redesign is complete only when every item below is true.

All 17 sections use one shared Settings shell, sidebar and width constraint.

Forms have labels, helper text, keyboard focus, error messages and 44 px targets.

Every live field, option, validation rule, permission and action still works.

Desktop implementation matches the 1120-1180 px centered composition.

No mockup-only copy is treated as a backend capability unless the live app supports it.

Narrow layouts stack columns without shrinking controls or text below readable sizes.

Current, loading, empty, error, saved, unsaved and disabled states have been tested.

The global EGGcraft/NivaDesk header remains visually recognizable and full width.

Destructive actions explain scope and require the same confirmations as today.

No gradient, glassmorphism, heavy shadow, giant card or edge-to-edge Settings canvas was introduced.

Connected, active, waiting and error states use both color and readable labels.

Final screenshots have been compared against the TARGET pages in this PDF.

FINAL RULE

When the live UI and a generated visual disagree, preserve the live feature and apply the written design rule. Never remove data or capability solely because it is absent from a mockup crop.
